Silicone scar Gel to help the skin prevent acne scars, surgery scars fade stretch marks, diminish older scars. silicone is recommended as the best treatment for scars

SILICONE GEL SCAR TREATMENT

No need for surgical scar removal procedures; silicone is the most recommended scar reduction treatment ingredient by dermatologists and plastic surgeons

SCAR TREATMENT: Intended to treat and prevent hypertrophic and keloid scars resulting from: surgeries, cosmetic procedures, mole removal, injuries, burns and much more. **SAVI SCAR** Silicone Scar Gel can also be used as an acne scar treatment

DAY & NIGHT: SAVI SCAR 100% Medical-Grade Silicone Scar Gel is effective 24 hours a day with twice daily application. Smooth non-greasy and odorless, this scar treatment is suitable for use on kids or people with sensitive skin

GENTLE ROLLER APPLICATOR: The convenient roller gently applies the scar gel to help soften, smooth and diminish the appearance of scars. When it comes to scar care, **SAVI SCAR** is the solution for scars

FOR BEST RESULTS: Use as part of a complete scar treatment regimen. Recommended duration of treatment is 60-90 days

Directions For Use

Apply suitable quantity of **SAVI SCAR** Gel in one way twice daily
